

How to play Tuj Lub

A Hmong top-spinning game

Plates 3-8

Tops are stationary. One point is earned for each top knocked over by the launching player.

Plate 2

One point is earned when the launching player knocks down the opposing team's spinning top.

Plate 1

When the top is struck, both tops continue to spin. The team's top that spins longer earns the point.

Launch Zone

Players use a tuj lub stick to launch their top at opposing team's spinning or stationary targets. Each team has six players, and each player launches one top.
