## FENCE REQUIREMENTS

---

City approval required for fences over 6 feet tall.

---

The fence and all supports must be built on your own property (not on your neighbor's). You may adjoin your fence to your neighbor's fence with written consent of your neighbor.

There are no regulations on most types of fence materials. However, a fence in the front yard or along a public street that is at least 80% opaque (solid) must be approved by the city. Barbed wire is prohibited except in farm zones where livestock is raised.

Fences over 2.5 feet tall in the front yard on corner lots cannot be located within the triangular area bounded by the property lines located 25 feet from a point of intersection of the property lines on 2 intersecting streets. Please call a City Planner at 651-249-2300 for further information.
